The export demand for grain and four has given an upward tendency to those staple commodities, which promises to exercise a healthful influence upon the fall trade, The orders to be filled are mainly from France and England, and advices are to the effect that there will be a continuous call for portions of our large supplies. This is certainly very oneograging. -Philadelphia Chronicie.

Chronicia.

The Raids on the Boundary Washington, July 23.—The Government has purchased at New Orleans the steamer Planter, a small hoat drawing but four feet of water, but strongly constructed. She will be properly armed and manued and sent to the Rio Grande for duty on that river to prevent Mexicans crossing into Texas and running off cattle. The Planter has been ordered to Mobile, and Lieutenant Commander D. C. Kells detached from the Pron-chal Canonicus and sent to that elly to lake command of the new vessel. It is said one or two other steamers of similar character will be purchased and fixed out to act with the Planter in the suppression of Mexican depredations.

Child Killed by A Rooster,—On Thursday a child of Mr. A. Langley, who lives two niles from from, while playing in the yard, was attacked by a rooster and was knocked down and spurred several times in the face and local before the mother could rescine b. Dr. Ewing, who was called in, found that one stroke of the care by

Dr. Ewing, who was called in found that one stroke of the spur had penetrated '* brain. The lattle saferry-eighteen mouths old—lingered in great agony until Saturday morning, when death came to lis relief. Dr. Ewing says that during a practice of over twenty years he never met with or heard of such a cuse before, and it is perhaps the first in the history of the world.—Gutsalin (Abs.) Times.

ONDITIONS....in all races four to enter and two to start. Any horse distancing the field or any pare thereof, shall be awarded first money only. Races unle heats, best three in five in harness. Heats in each day's races may be trotted alternately. The Association reserves the right to postpone the races for any just cause. Herses will be called at 1.30 P. M., and started at 1.45.

MARKET REPORTS. PUBLIC SALE. DUBLIC SALE.

ON SATURDAY the sth day of Auditist, the understance, Agent for the understance of the unders OBTTY-HTBG. A Council stone of a new course was laid in Clarion county, a few days ago. A cavicy was prepared in the stone for the reception of coins, paper and other suitable articles. It had also been decided to place in the recognize a tin box that was deposited in the concentration of the old charch nearly forty years ago. For this purpose the stone was lifted from its position in the presence of a large multitude, when to the asconishment of all no tin box could be discovered. It was but too ovident that some fluel had attended the cereatonies in 1838, and rearried during the night to overture the stone, from which he abstracted the box and its contents, and then quietly replaced the stone in its former position, so that no suspicion was entertained that such a dastardly act had been committed. 19 00 (e) 21 00 | July 20, 1875. 18

PRIVATE SALE. MARRIED. THE NEW POSTAL CARD.—The color HARBARY E. HEYER, both of this county. A MARGARY GARBARY E. HEYER, both of this county. A MARGARY GARBARY II, december, others. A MARGARK GAMBREATH decensed, offers at Priving State In serious before series of the DIED. nically styled "orean-white;" in other words, it is yellowish white. This color the Department, believes experience the Department, believes experience of the color of the Co the Department believes preferable to the tipe tipe att, in the tipe att at a to the tipe att. pure white, because the latter soils so casily. The disign of the engraving is the same as that heretofore agreed apon, viz: in the upper left-hand corner is the monogram "U. S.," in crammental letters, across which is a scroll with the words "Postal Caril" in bold-face latter. Below this, in a straight line, in hair feter, is: "With the address on this sid—the message on the other," In the upper right-hand corner is the

EAGLE HOTEL, the upper right-hand corner is the stamp, the design of which is a profile line of the floidess of Liberty, surrounded by a frame-work border, the sides of which rapresent faces, connects.

In the upper right-hand corner is the Mrs. Matta filling, on sort a Arian Hobbs, and the Connects of the Grades of Which rapresent faces, connects. Gettysburg, Pa. GEO, HOPPES, Prop'r. sides of which rapresent faces, connected at the top by a seroll bearing the distance of the fact in Little sea of John 11, and Alverta Hinkle, aged 7 months and 2 days.

FARM AND GARDEN.

REARING STOCK TO MAKE MILKERS. The best method of growing stock t make them mest propitable for the daiiv, has recently been discussed at some length by Mr. A. L. Fish, of Herkimer n the Utica Herald. The prominent idea advanced by Mr. F. is that in order to rear cows for "fluent milkers," they should have secoulant food from the time of their birth till brought into R dsing crops without knowledge as to milk, which, he says, is usually at two whether they will sell or not, has sap-He argues that the food of the calf, when a change is made from milk. should be cooked and fed warm or near the temperature of blood heat, because it facilitates a more perfect digestion for which the distributing functions are in waiting. This position, he says, died, and his inventory was less by more in the change from milk to grosser food three years before, the young animal shows less thift, prorequired to fit the food from assimilation Housins, To care a horse of bridge tion. The ealf adds more weight in breaking, get a piece of bed coul, four growth from a given amount of food it times the length of the horse, and takes during the first week than ever double it in the middle, und at the doubafter. The extraordinary size a caif ed end make a loop, through which

with a calf otherwise equal, except that its food is unprepared for ready assindlation, shows it expedient to prepare the food as near as possible for ready distrif pull back the strain will be on the root bution in the system, especially for of his tall before the halter strap will forced growth and for milch cows. A skillfal breeder, he argues, must anderstand adapting the various kinds ing laint a few threes in the stable he of food to develop esseptiat points and will abundan any such propensity. fir them by babit in the constitution. The functional relations in the animal organism are based upon the principle of demand and supply. Hence the ben- is exposed to the intense heat of the efit of carly exercise of the faculties

most essential for practical use. He would have the animal reared of food that is calculated to stanulate a untky habit, and he would have the any mal "come in milk" at an early age, thus educating her from birth for the

gust are probably the best months in the year for destroying weeds. Th summer heats are at their flercest and all annual weeds cut down at the root speedily wither and die. The tougher perennials have made their growth for the season and have nearly perfected their seed. The root then has the least vitality, and if the top be cut off a especially if the weeds grow in tough sod or grass. We have known frequent

vitality of the putch so much that it would produce only here and there a stalk until the field was again plowed. In growing corn August is, of all months, the time to destroy Canada THE HOUSEKEEPER thistles and quack. Keep the plant down early in the season, then, as the corn begins to tassel out, go through with a light hoe and cut out every with a light hop and cut out every order. It is nature's own food during spear of shistle and pull up every blade the sulry months. Meats and gravies, of quack with all the roots that can be got attached. The quack should be put more than repaid not only in the corn should find its way into every house crop but in the succeeding oats and | bold. barley, besides leaving the land cleaner | Gat meal and milk form the staple for years thereafter. - Moore's Rural.

idea of the term thin seeding from the na sible and will produce the same or the vital forces. But from the straw even better results. A noted English berry in the early summer to the late farmer informs us as to how far it may peach in autumn, the presence of ripe be carried. "I related last year that a fruit on the table will be found an expeck of seed wheat per acre, dibbled in cellent preservative of health, at intervals, one kernel in a hole, pre-duced 58 bushels of be ivy wheat per REMEDY TOR POISON BY IVY.-acre, and two and three-quarter tons of seems to me as if I read all kinds of straw; in fact, the thickest and heavi- cores for my or mercury poison except est crops of corn (wheat) and straw on the right one. I have always endeavor-the fairn. It was seen at various ed to keep it before the public, but have periods of its growth by many agricul-tural and other visitors. During the winter a single stem baying appeared from each kernel, the land at a distance with a soft, linty piece of linen ragappeared as it masown, and we were Three or four applications are sufficient often asked why we had emitted to be effect a cure. If the passon is of drift that particular portion of the field, the face and nearing the eyes and In the spring each stem radiated its shoots horizontally, to the extent in some instances of 30 to 48 stems, and cure, and by watching it closely one ultimately became the best crop of the can see the tevered bisters here from farm; and what is often convenient in white to yell in during the application. baryesting, about four days later than This remedy for try poison should pre-

easily pasoned to keep sugar of lead in the house all the time. Let It be labelject the California Agriculturist Says; moment at is wanted. Keep at well "Hetter not do it, because it is an inju-ity to it—an injury that years of careful culture cannot roundy. Heavy soil, once puddled and packed and wet, remains so for a long time. Every step third checkens are thus prepared: The the horses take on wet soil puddles it. chickens are killed, scalded, picked and The plow turns it over without pulver- washed out cleanly in water, then quar izing it, and leaves a stiff glaze on the fered and thrown into boiling land. It furrows. Better be idle a few days, a few maintes they are done brown or even sow the grain without plowing and are then to be removed and served and served and served in when the ground direction in the property of the property off, than turn or seriously pointe the again. In this way the fowl is "tender through when they get started, rain or shine, mud or mellow, regardless of
